QUALITY ASSURANCE EXECUTIVE

Results-driven QA professional with 5 years in Medical Device and IVD sectors, specializing in ISO 13485, ISO 14971, and IMDR-aligned Quality Management Systems. Proven expertise in end-to-end regulatory compliance, CAPA, Risk Management, Process Validation, and Internal Audits – with a detail-oriented, ownership-driven approach to strengthening quality culture.

PROFESSIONAL EXPERIENCE

Vantive

Quality Assurance Analyst

March 2025 - Present

Driving quality assurance operations for kidney care therapies within a global medical device organization, ensuring full compliance with ISO 13485 across regional and cross-functional processes. Actively managing critical QMS activities including CAPA, Change Control, and Non-Conformance handling while supporting continuous improvement and regulatory adherence across South Asia and APAC regions.

Key Job Responsibilities and accomplishments:

- Managed end-to-end Change Control and CAPA processes in TrackWise, ensuring all product, process, and system modifications are evaluated, approved, and documented per regulatory and quality standards
- Handled customer complaints from South Asia – performing due diligence and tracking complaint samples to respective global manufacturing sites for timely resolution
- Initiated and managed Non-Conformance reports in TrackWise, identifying deviations, facilitating resolution, and maintaining product and process integrity
- Ensured adherence to ISO 13485 through meticulous record-keeping, process monitoring, and cross-functional collaboration; contributed to SOP development and updates

Nulife

Quality Assurance Executive

July 2022 - March 2025

Assisted company-wide quality assurance operations, achieving 100% compliance with ISO 13485 standards across all processes. Spearheaded the implementation of robust complaint and nonconformance tracking systems, reducing product deficiencies by 30% through root cause analysis and corrective actions. Enhanced employee performance and retention by identifying training needs, streamlining internal reporting, and ensuring adherence to calibrated testing schedules.

Key Job Responsibilities and accomplishments:

- Led ISO 13485 implementation and compliance, managing Non-Conformance processing and Root Cause Analysis to resolve issues and reduce product deficiencies
- Oversaw CAPA and Post-Market Surveillance activities, implementing strategic measures to enhance product quality and align with customer expectations and company objectives
- Documented quality assurance efforts through internal audits and reports while identifying training needs and deploying programs to maintain company-wide compliance
- Ensured device calibration on schedule and inspected products to confirm quality standards, promptly reporting concerns to senior management with proposed corrective actions

Astam Diagnostics Pvt. Ltd.

Quality Assurance Executive

March 2021 - July 2022

Supported end-to-end quality management system implementation for IVD products, ensuring compliance with national regulatory standards across manufacturing, inspection, and post-market activities. Contributed to building a compliance-first quality culture through effective audit management, regulatory documentation, and cross-functional collaboration.

Key Job Responsibilities and accomplishments:

- Managed QMS activities including SOPs, CAPA, complaints, Change Control, and equipment calibration and validation for IVD products
- Prepared regulatory documents including Site Master Files (SMF) and Drug Master Files (DMF) to support product licensing
- Oversaw internal and external audits and post-market surveillance, ensuring sustained compliance with national standards
- Compiled and presented Management Review Meeting (MRM) data, providing quality insights to senior leadership
